

## July 2019 Quarterly Progress Report

Over \$2 billion in New Project Commitments in Public Transit and Green Transportation

**\$2 billion** investment commitment to expand regional transportation in the **Greater-Toronto and Hamilton Area** in partnership with Metrolinx and Infrastructure Ontario

**\$55 million** commitment towards **High Frequency Rail (Quebec City –Toronto corridor)** planning and pre-procurement

*As a strong supporter of the concept of the Canada Infrastructure Bank and its potential to **leverage new kinds of investments in major infrastructure projects**, we and our big-city Chamber colleagues in the Canadian Global Cities Council can now point to two major transit-related investments in Canada's two largest cities.*

*This \$2 billion commitment by the CIB delivers **new money for GTHA transit** and will attract additional investment from the private sector that will **strengthen Ontario's economy**.*

*From a public policy standpoint, the CIB provides **opportunities to improve the delivery of new infrastructure projects** and produce a socially beneficial result. The investment in Ontario's GO Expansion fulfills those goals.*

*The announcement that the Canada Infrastructure Bank is involved in (VIA HFR) is particularly promising because it **will accelerate upstream planning and the eventual completion of the project**.*

## July 2019 Quarterly Progress Report

### Advisory, Project Development and Investment Opportunities

**39 new infrastructure projects** assessed with an estimated capital value of **\$17 billion**

**25 projects** in ongoing review or active due diligence

5

Public Transit

4

Trade and Transport

9

Green Infrastructure

7

Broadband

### Working Coast to Coast to Coast

Our **advisory engagement** and investment partnership development included:

- **31 provincial / territorial departments or agencies**
- **21 speaking engagements**
- **12 industry forums**

We provide **public sponsors** with specialized expertise and advice on infrastructure investment including:

- Financial advisory and structuring
- Equity investments and lending
- Construction and project finance
- Public-Private Partnership structuring and procurement
